

TEAMview360⁺

TeamView360 measures each individual's scores against those of their team

The tool uses 31 team orientated behaviours within seven major competencies

- Problem solving
- Planning
- Controlling
- Self-management
- Managing relationships
- Leading
- Communication

TeamView360 is a comprehensive tool for understanding and enhancing team effectiveness and performance. It focuses on self-development within the team, helping to convert team intentions into individual actions. Each person within the team will gain a better understanding of his or her strengths, limitations, and developmental areas.

Scores can be viewed as raw score averages or standardised scores. The assessments and results are confidential, and team member's ratings remain completely anonymous. These results are used to produce a powerful, graphical report with an easy-to-follow Personal Effectiveness Plan for each team member.

It can be used effectively alongside its sister product, the Team Effectiveness Survey, which measures overall team performance and compares it with customer views.
